DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 9 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what scope the claim limitation "rock-like structure" is to encompass as this term could encompass anything from a skyscraper to a diamond solitaire.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 6, 7, 9-12, 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns et al., GB 2 213 360 A (Burns).

Burns discloses a first body (20), a passage (26), a transparent closure (10) and a second body (30) preventing viewing of the cavity; wherein the two bodies form a unitary structure (reference Figure 1); wherein the bodies define a rock-like structure; wherein the passage is defined in part by the first surface area of the first body; wherein the complimentary surfaces are planar surfaces of substantially the same size and shape.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burns as applied to claims 7 and 12 above in further view of Lombardi, US Patent 4,110,552.

Burns discloses the invention substantially as claimed. However, Burns does not disclose the use of magnetic members for holding the bodies in registration with one another. Lombardi teaches within the analogous art of enclosure cover means, the use of a magnetic member disposed on the bodies for providing an environmental seal to the registered bodies. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the magnetic bodies as taught by Lombardi with the device of Burns in order to ensure a secure seal between the two bodies.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Atamian et al. (US 6,105,535), Matsumoto (US 5,862,778), Tominaga (US 5,855,187), Smith (US 4,928,631), Ritchey (US 5,493,997).
